DETAILED ACTION

Claims 1-45 are pending.

Drawings

1. New corrected drawings are required in this application because the drawing received on June 28, 2001, are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
2. The drawings are objected to because figures 18 and 19 recite item 254 with an arrow marking a flow meter but said flow meter has been replaced by analog flow meters, 410 and 412. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the

drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: the cross-noting section of the specification needs to be updated with the patent number of the parent.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite since "said recycled emulsion" lacks proper antecedent basis and it is unclear what is intended by "said recycled emulsion". Applicants never set forth an "emulsion" in the claim other than the preamble. To the extent the ASA is in the form of an emulsion or added to an existing emulsion, the claims should so state.

In a related issue, claim 17 refers to a mixture of ASA and an emulsion.

Applicants should confirm the use of the term "emulsion" rather than "emulsifier".

Please note that "said emulsifier" lacks antecedent basis in claim 20. Please compare the claim 1 method.

Art Unit: 1712

Claim 3 employs the term "said mixing mean" should be changed to "said mixing means".

The above are examples of indefinite limitations set forth in the claims.

Applicants should review each of the claim limitations for proper antecedent basis and the setting forth the formation of the emulsion. To the extent an existing emulsion is incorporated into the process, the claims should make said incorporation clear as well as basis provided as set forth in the originally filed disclosure.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-45 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,207,719. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims substantially overlap. To the extent the claims differ in the automating a manual step, said automating is considered *prima facie* obvious. See MPEP 2144.04(III).
